

Pensions news item for NARPO

Spotlight on Pensions

The Pensions Team at the National Police Chiefs' Council (NPCC) are a national collaboration, providing strategic pensions support and guidance to the 43 police forces and their 13 pension administrators across England and Wales.

In September 2023, The NPCC Pensions Team launched a brand new pensions website (<https://policepensioninfo.co.uk/>) to help members understand the McCloud age discrimination remedy and what it means for them.

To aid with navigation, the website is split into different pages:

Home page

This has key information about the remedy, as well as links to some animation videos and a news carousel identifying new content or newsworthy items.

Useful information

A range of documents can be found on this page giving an overview of remedy, along with a project update document.

FAQs

This is exactly what it says on the tin! A wealth of FAQs all about remedy, these are split into different subject areas for ease of navigation.

Member Remedy documentation

A range of member remedy factsheets and claim forms on specific subjects, including one about contribution adjustments, unauthorised payments as well as how to make contingent decisions and compensation claims.

News

This page provides an historical list of all new content added or amendments that have been made to the website since it came into being, as well as any newsworthy items.

Find your administrator

You can find the best contact details for the pension administrator that is paying your pension, all you need to do is choose the force that you retired from.

Calculator

For members affected by remedy, a calculator tool is available to enable members to see what remedy benefits they may be entitled to.

What's next

Of course, we understand that not all members are affected by remedy and the long-term plan is that the website will be developed to cover more aspects of police pensions more generally and become a one stop shop for members.

In the meantime, if you are a member that is affected by remedy, then please have a look at the website to understand more about what you can expect and when you are likely to receive your choice.
